

“Free” Energy Monitors.

Some Energy Companies are offering “free” Energy Monitors similar to The OWL.

However, these “free” Monitors are not always free. In order to receive your “free” Energy Monitor you are tied into a 12 month contract and if you decide in that time to switch suppliers you could be charged up to £45.00 for the Energy Monitor. As well as this the “free” monitors are inferior to our OWL Energy Monitor and are not battery powered (they must be plugged into the mains) therefore, cannot be moved around the house. Also, the “free” Energy Monitor does not give the same range of information as The OWL Energy Monitor.

Click the below to see our OWL Energy Monitor page.
